后台需要全实现

后台算法：换脸算法、识别脸型算法、打分算法、头发换颜色算

一般发送的数据包格式：

```
{
    "username":"wzd",
    "sourcePhotoName":"pic.jpg",
    "targetPhotoName":"test2",
    "modifyType":"0",
    "otherOptions":"i love it!"
}
```

```
public static final String exchangeFaceChoose = "0";
public static final String recognizeFaceTypeChoose = "1";
public static final String changeHairColorFaceChoose = "2";
public static final String cutoutFaceChoose = "3";
public static final String scoreFaceChoose = "4";
```
